

THE GOOD OLD DAYS OF PEST CONTROL ARE BACK.

With its years of reliable performance, it's no surprise Dagnet® SFR Termiticide/Insecticide was an applicator favorite and industry standard.

Formulated with the original SFR technology, Dagnet® SFR Termiticide/Insecticide delivers proven efficacy, low odor, superior handling and a versatile label. Its reliable knockdown and residual help you provide continued protection against fleas, termites, ticks, ants, chinch bugs and 30+ other nuisance pests.

WHAT DOES IT CONTROL AND WHERE?

Dagnet® SFR Termiticide/Insecticide kills termites by contact and, as a repellent, prevents them from entering the treatment zone. It's labeled for use in and around residential and commercial structures, including schools, nursing homes, hospitals, restaurants, hotels and food processing establishments.

FAST. CONVENIENT. PROVEN.

This valuable pest management solution is returning to the market in early 2019 with the same proven control and reliability customers have come to expect from FMC products. It will be available in a unique 1.25-gallon container with a new attached measuring chamber for fast, accurate and convenient dosage when mixing.
