

POWERFUL AGAINST WEEDS, SAFE FOR LIVESTOCK

With the active ingredient, carfentrazone, Altify™ IVM Herbicide is the perfect balance of effective weed control and no restrictions for grazing livestock. This easy-to-use herbicide has quick burndown, and one-hour rainfastness ensures a flexible application timeline for busy land managers. Altify™ also delivers efficient results, requiring only 1-2 ounces per acre for fast-acting, flexible weed control.

VERSATILE IN MORE WAYS THAN ONE

Ranges and pastures are not the only market where Altify™'s powerful protection can be used. The herbicide is also effective in other IVM segments such as rights-of-way and industrial areas. In all these markets, Altify™ is proven to control over 30 species of weeds, including Palmer Amaranth and Velvetleaf, along with ALS and Glyphosate resistant Kochia. The EW formulation is designed to be a versatile tank-mix partner, making Altify™ IVM the ideal agricultural weed wrangler.

ALTIFY™ IVM HERBICIDE

- EW formulation for custom tank-mixture
- Broadleaf weed control
- Activity on certain ALS and Glyphosate broadleaf weeds
- Low use rate
- 1-hour rainfastness
