

CHEMISTRY THAT WORKS

Portfolio[®] NXT Herbicide combines the protective powers of active ingredients sulfentrazone and carfentrazone to knock out weeds in non-crop sites such as railroad rights-of-way, highway, roadside, pipeline and utility rights-of-way, industrial areas and fence rows. Both ingredients work with each other and any other products in the tank for pre- and postemergent control of grasses and broadleaf weeds, making Portfolio[®] NXT the perfect addition to an herbicide dream team.

VALUE THAT PERFORMS

Portfolio[®]'s effective duo of active ingredients produces a lower use rate and reduces weed population over time. Effects set in quickly, and the formula offers an extended residual control to maximize the outcome of each application. Hit harder and last longer with quick-acting, efficient Portfolio[®] NXT.

PORTFOLIO[®] NXT HERBICIDE

- Liquid formulation for custom tank-mixture
- Pre/post broadleaf weed control
- Activity on ALS and Glyphosate resistant weeds
- Longer soil residual (rate dependent)
- Flexible applicator
- Effective in many industries and regions

WEEDS CONTROLLED:

- Kochia
- Russian Thistle
- Lambsquarter, common
- Morningglory
- Palmer Amaranth
- Pigweed (redroot and smooth)
- Yellow Nutsedge
- And over 49 other labeled weeds

LABELED USE SITES:

- Railroads
- Highways
- Roadsides
- Pipelines and Utility Rights-of-Way
- Industrial Areas
- Fence Rows
- Other Non-Crop Sites
